B. ASSESSMENT

NECROSOCIETY - INTERNAL - PAGE 1 OF 2

ORIGIN. Born in Killeen, Texas, outside the army post. Served in US Special Forces, then went private as a military contractor. Worked in Afghanistan from 2016, Iraq from 2017 and Syria in 2019. He calls that work "enhanced interrogation" programs. The Americans say no program of theirs ran under that name in those years and that he questioned prisoners on his own authority.

2019. In March 2019, 23 civilians died in sessions he ran without authority at a holding site in northern Iraq. The FBI interviewed him in Erbil and put him on the polygraph. Two days later he was gone. He has worked for hire since: information extraction, for whoever pays.

METHOD. Sensory deprivation, drugs, and electrical stimulation of the nerves. He keeps a mobile "pain laboratory" of his own equipment. People who survived him describe pain they did not think was possible, and say they were awake for all of it. He knows the body well enough to keep a man alive and conscious for three days. His price is set by the hour.

STIMULANTS. He takes large amounts of military-grade amphetamine during sessions that run 48 to 72 hours. The DEA put his own use at about \$20,000 a month in 2023. Their laboratories have found levels in his blood that should have killed him. The DEA also ties him to a stimulant supply ring that sells to mercenaries across the region, with its manufacturing in Afghanistan.

THE MASK. A military ballistic mask, worn at all times. In March 2021 a sniper's round hit it in Mosul. The mask held. The left eye was destroyed and the socket was cauterized in the field. The mask has not come off in front of anyone since. Under it the face is badly scarred and would identify him at once.

MONEY. Paid in bitcoin and in narcotics, nothing else. He sells under the name BLACKWATER_GHOST on a dark web market. The FBI broke into his client records in October 2023: 847 bitcoin payments, and a price list that runs from \$25,000 for a day to \$100,000 for three. About \$2 million of his was frozen in November 2022. He has made it back.

MOVEMENT. His base is a remote site in Kunar, Afghanistan, with a chemical laboratory. The Americans place him at eight detention sites across the Middle East. They call them black sites. They were not American. His equipment and some of his money move through Texas, New Mexico and Arizona, and in August 2023 he was in Texas himself. There is no record of how he came in.

NECROSOCIETY ALIGNMENT. Member. Our interrogator, and an enforcer when we need one. He was brought in for the first job and stayed.

CURRENT THREAT STATUS. At large. Last fixed in Kunar, Afghanistan, February 2025. Their notes say he is always armed and always on stimulants, that the mask is rated against .50 calibre rounds, and that he carries a nerve agent in a concealed container. Their order is not to attempt capture without a full tactical team.

HANDLING. Do not look at the mask. Pay on the hour agreed, in the form agreed.

El Paso - JTTF - medical records summary

Re: (U) 8SEEKER - medical and laboratory records obtained through partner services
Case ID #: 315N-EP-3410573
Date: 02/24/2025

(S) Four records were obtained. They are summarized in date order. Records 2 to 4 were translated from Arabic and Kurdish by FBI Language Services.

1. Field trauma card, Mosul, 03/11/2021. Completed by a medic of the armed group the subject was working for and recovered by an Iraqi service. A rifle round struck the ballistic mask; the mask held. Fragments destroyed the left eye. The socket was cauterized in the field. The patient refused all pain medication and would not be put under. He insisted on staying conscious for the whole of the surgery. No anaesthesia was used.

2. Detention observation, Sulaymaniyah, 08/12/2024 (held 31 hours by Kurdish security on a weapons charge, released on cash bail). Signs of chronic sleep deprivation. Hypervigilant and paranoid, consistent with long-term amphetamine use. Spoke of "clients" and "contracts". Asked twice for his tablets.

3. Physical examination, private clinic, Sulaymaniyah, 09/03/2024. The patient refused to remove the mask. External examination: extensive scarring visible around the mask edges; malnutrition consistent with stimulant use. The patient became agitated when removal of the mask was suggested, and the examination was ended. Blood was drawn before he left.

4. Laboratory report on the sample from record 3, 10/15/2024. Amphetamine at a concentration normally fatal, in a patient who was walking and talking when the sample was taken. The laboratory notes that a tolerance of this level points to daily use over a long period.

(S) Comment. No record exists of any treatment since the 2021 injury other than these.

to lose it. they kept a copy*

Re: (U) 8SEEKER - psychological assessment
Requested by: El Paso, JTTF
Date: 02/26/2025

(S//NF) **Sources.** Recordings of two FBI interviews held in Erbil, Iraq on 03/16 and 03/18/2019 during the inquiry into deaths at a holding site, the medical records summarized separately, and the case file to date.

(S//NF) **Structured measures.** PCL-R: 36 of 40 (Factor 1 and Factor 2 both elevated). HCR-20 V3: summary risk rating HIGH; risk of serious physical harm HIGH. Antisocial personality disorder: all seven Criterion A features present.

(S//NF) **Observations.** Flat throughout. Shown camera footage of his own sessions in 2019, he showed no response and called the detainees "subjects for experimentation". Manipulative where money is involved. Wide criminal versatility. Detailed knowledge of anatomy and of drug compounds. Reporting since the 2021 injury describes a harder pattern than the 2019 interviews: longer sessions, more stimulants, more sadistic traits.

(S//NF) **Diagnostic impression.**

- F60.2 Antisocial personality disorder, severe, with psychopathic features
- F15.20 Amphetamine-type substance use disorder, severe
- F43.12 Post-traumatic stress disorder, chronic (combat-related)
- F40.298 Other specified phobia (removal of the face mask)
- Z90.01 Acquired absence of eye (left)
- Z53.29 Examination not carried out because of patient's decision

(S//NF) **Risk.** Imminent and extreme. Violence is instrumental and paid. If detained, recommend indefinite detention under maximum security. Do not interview without full tactical support.
