B. WHAT WE KNOW

NECROSOCIETY - INTERNAL

BEFORE. Working since 2022: cryptocurrency theft and attacks on modern banking systems. Strong on blockchain manipulation and on getting into financial networks.

2024. He tried to get into our own network. Two of our analysts ([REDACTED] and [REDACTED]) followed the intrusion through the logs back to the place he was working from. When they looked closer, he was further in than we had first seen.

HOW WE TOOK HIM. We did not hunt him. Our people went back down the same TCP connection he had come in on, used a zero-day in his own security software, opened a reverse shell on his workstation and took control of everything on it.

RECRUITMENT. Leadership decided he was worth more working than dead. He accepted. In 2025 he joined the Iraq-a-Holics on the cyber side and rose quickly; he is now one of their most respected. He steals cryptocurrency, gets into databases and helps plan cyber operations. He still collects everything and still wears the shemagh on operations.
