B. ASSESSMENT

ORIGIN. Saudi national. Left Riyadh in September 2017 and entered Iraq two days later. Trained as a cyber operations specialist while moving between Iraq and Syria, 2017–2018. His turn began after he was given material recovered from destroyed ISIS strongholds - occult texts, not religious ones. He is one of the founding members of this organization and established its first cell.

PSYCHOLOGY. Every service that has assessed him reaches the same words: antisocial, psychopathic, without empathy. He manipulates as easily as he breathes and lies when the truth would serve him just as well. He brought vulnerable people into our operations deliberately. He is highly intelligent. Long exposure to combat left him unstable, and he uses the instability.

THE FACE. During a psychotic break in late 2020 he rebuilt his own face. Using battlefield surgical methods he altered the bone structure, filed his teeth to points, cut ritual scars across his torso and limbs in an old Middle Eastern pattern, and put metal implants under his skin. Witnesses since call his appearance "otherworldly". Most of them will not describe it further.

CAPABILITIES. Network intrusion at a level the Americans rate above most state programs. Small arms, preference for close quarters. Improvised explosives, learned in Iraq. Counter-surveillance. His weapon is a ceremonial kukri he brought out of Afghanistan. Recovered reporting links it to ritual executions. We do not dispute this.

WHAT THE OTHERS WRITE AROUND. He studied black magic and witchcraft in the Gulf, then corrupted Christian rites taken from abandoned monasteries in Eastern Europe. Recovered reporting describes him changing form. It describes him knowing about raids before they are planned, breaking prisoners with methods their own interrogators could not repeat, and sitting through hostile interrogation unaffected. Their analysts call it prosthetics, doubles, handset sharing. Their witnesses do not.

PSYCHOLOGICAL OPERATIONS. He works out of abandoned industrial sites in several countries, broadcasting on equipment salvaged from destroyed communications centres in the Middle East. His methods come from prisoner interrogations overseas. One recruitment action in 2021 put 47 people in hospital. Twelve of them did not recover.

ROLE. Tactical command of all militant operations and of foreign recruitment. He trains new cell members personally - close combat, and the manipulation methods described above. Among operational units his word is final.

FOREIGN CONTACTS. Live channels to armed cells in Iraq, Syria and Afghanistan. These contacts move weapons for us, share methods of interrogation, and carry logistics for operations in the West. The Americans believe he coordinates arms traffic through them. They are correct.

WHAT THEY HAVE. The recovered pages that follow show the American file as it stood in December 2024: one passport, one set of intercepts, one interview with a contract medic, one psychological assessment written without ever meeting him, one polygraph that was stopped early, one financial summary and four locations. They do not have a name. Their surname and given-name fields are blacked out because ours are, and theirs are empty.

NECROSOCIETY ALIGNMENT. Founding member. He did not join the organization; it was built around the room he was sitting in. He selects which recruits are brought to the second meeting and which are not seen again.

CURRENT THREAT STATUS. At large. Western services list him among the most dangerous people connected to this organization and have issued capture-or-kill authority. Intercepts from late 2024 point them toward a coordinated attack on population centres. Their warning to their own personnel is reproduced here because it is accurate: do not engage him directly. Prolonged contact has ended in permanent psychological damage, and in suicide, more than once.

HANDLING. Our people do not meet him alone. Do not record him. Do not describe his face in writing. Any contact outside an arranged meeting is reported the same day.

Title:	(U) NECROSOCIETY; HXLX - INTERCEPT SUMMARY, 28 NOV - 01 DEC 2024
Date:	12/03/2024
From:	WASHINGTON FIELD CT-6 Contact: SA [redacted]
Approved By:	SSA [redacted]
Drafted By:	[redacted]
Case ID #:	315N-WF-3374119 (U) NECROSOCIETY; INTERNATIONAL TERRORISM
Synopsis:	(S//NF) Summarizes encrypted and voice traffic attributed to HXLX collected under FISA authority 24-[redacted].

Details:

(S//NF) Two encrypted messages were recovered from a device seized in Baghdad on 11/28/2024 and decrypted by OTD. The device's owner has not been identified. Plaintext follows:

> 11/28/2024 23:47 UTC - "The ritual must proceed as planned. The vessel is prepared."
> 11/30/2024 04:12 UTC - "Baghdad facility compromised. Switching to Tehran safehouse."

(S//NF) On 12/01/2024 at 18:22 UTC a call of 4 minutes 18 seconds was placed from a Zain Iraq handset (+964 7[redacted]) to a number not yet attributed. Cell site: Baghdad, Karrada. The speaker identified as HXLX by voice comparison is A; B is an unidentified adult male.

A: The weapons from [redacted] are secured.

B: Good. Begin the next phase at the [redacted] compound.

A: And the [redacted]?

B: [unintelligible, 6 sec] ...the transformation is complete.

(S//NF) Call detail records for the same handset, 11/30 - 12/01/2024:

Date / time (UTC)	Other party	Duration	Cell site	Direction
11/30/2024 14:37	+966 5[redacted] 4521	2:43	n/a (inbound roaming)	IN
12/01/2024 18:22	+964 789[redacted]	4:18	BAGHDAD - KARRADA	OUT
12/01/2024 22:15	withheld	0:15	signal lost	IN

(S//NF) Comment: "vessel" appears in two earlier intercepts in this case and in INTERPOL reporting of 02/2024 on unlicensed surgical sites. Its meaning is not known.

(U) Lead set for OTD to continue exploitation of the Baghdad device.

FEDERAL BUREAU OF INVESTIGATION

Date of entry 12/09/2024

[redacted], a medic employed by a private security contractor, date of birth [redacted], was interviewed by telephone. After being advised of the identity of the interviewing Agent and the nature of the interview, [redacted] provided the following information:

In August 2024 [redacted] examined a detained male at a site near Erbil, Iraq. The detainee was later identified by photograph as HXLX. His facial bone structure had been altered, which [redacted] described as "amateur work that healed like it was done by a surgeon." All of his teeth had been filed to points. X-rays showed several small metal implants under the skin of the forearms and chest. [redacted] could not say what the metal was.

On 10/15/2024 [redacted] assisted with emergency surgery on the same male after an IED blast. The detainee declined anaesthetic and remained conscious through the procedure. He did not speak. His core temperature was recorded at 94 degrees Fahrenheit for the length of the operation. [redacted] said the surgical team "stopped talking about halfway through" because the wounds were closing faster than they could suture them.

On 11/20/2024 the detainee was brought in again with blade wounds and burns. He refused treatment. [redacted] watched one laceration on the left forearm close over approximately twenty minutes. [redacted] was asked whether the injury could have been more superficial than it appeared, and answered "I have been doing this for eleven years."

A toxicology screen from September 2024 found compounds [redacted] described as "minerals, old ones, the kind you read about in alchemy books." The laboratory report was not provided to the FBI.

[redacted] has not slept well since. [redacted] asked that the interview not be recorded and that the interviewing Agent not use the detainee's name on the call.

Re: (U) HXLX - indirect psychological assessment (records review)
Requested by: Washington Field, CT-6
Date: 12/02/2024

(S//NF) **Limitations.** This assessment is based on records only. The subject has not been interviewed by BAU personnel. Two attempts by partner services to conduct an interview were ended early (see polygraph report of 07/2021).

(S//NF) **Structured measures (records-based).** PCL-R, coded from file material: 38 of 40. HCR-20 V3: all historical items present; clinical and risk-management items rated high. These scores should be read as an estimate.

(S//NF) **Observations.** Partner-service interview notes describe complete flatness of affect. Shown footage of the 2021 hospitalizations, the subject remained still and referred to the victims as "vessels for experimentation." He claims divine status and the ability to change his physical form. He described human anatomy to one interviewer in a level of detail that the interviewer found disturbing enough to end the session.

(S//NF) **Diagnostic impression.**

F60.2 Antisocial personality disorder, severe, with psychopathic features

F60.81 Narcissistic personality disorder, grandiose type

F44.81 Dissociative identity disorder (provisional)

F43.10 Post-traumatic stress disorder, combat-related

Z65.8 Religious or spiritual problem (occult practice)

(S//NF) **Risk.** Imminent and extreme. Violence is instrumental and ritualized rather than reactive. If detained, recommend indefinite holding under maximum security with no unscheduled human contact. Do not interview without full tactical support. Interviewers should be rotated after one session.

(S//NF) The claims of transformation are assessed as delusional or performative. BAU notes, without drawing a conclusion, that three partner-service witnesses gave matching descriptions of a change in his height during a single interview.

POLYGRAPH EXAMINATION REPORT

prepared for a partner service - translated copy

EXAMINEE	DATE	LOCATION
HXLX (as identified)	08 JUL 2021	DUBAI - [redacted]
EXAMINER [redacted]	TECHNIQUE Zone comparison, 3 charts planned	CHARTS COMPLETED 1 (ONE)

Relevant questions

R1. Are you human? — *asked at the request of the case officer*

R2. Can you change your physical form?

R3. Have you killed anyone in the last twelve months?

Chart data

Chart 1. Respiration: regular, 4 breaths per minute throughout, including during the questions. Electrodermal: no measurable response to any question, relevant or comparison, including the known-lie comparison question. Cardio: 31 beats per minute at the start of the chart, 31 at the end.

Result

NO OPINION. The data cannot be scored: A tracing this flat is normally a sign of equipment failure; the equipment was tested before and after the examination and worked correctly both times.

Examiner's remarks

The examination was discontinued after the first chart. Before the second chart the examiner reported a severe headache and nausea and asked to leave the room. The examinee did not move during the break. When the examiner returned, the examinee asked him a question about his daughter, by name. The examiner has no daughter on any record held by the service.

Examinee released to [redacted] at 16:40. He was not seen leaving the building.

he has a daughter.

Saudi national walks out of airport custody

DUBAI - A Saudi man detained at Dubai International Airport on Thursday on an international notice left custody the same evening, airport police confirmed. The passport he travelled on was found to belong to a man who died in 2016.

Officers who escorted the detainee gave differing descriptions of his height and age. An internal inquiry is under way.
