Remarks:

Printed photograph found pinned to a wall in the house in Dublin searched on 13 OCT 2023. The Garda logged it as "occupant (?)". Whether it shows him is not known. No one has photographed his face.

they never agreed
this is him either

B. ASSESSMENT

WHAT HE IS. We do not know, and this file does not decide. The recovered papers give two answers. The people who wrote them do not agree, and some of them have been in a room with him.

THE FIRST READING. A man. An unidentified patient held at a Pennsylvania state hospital from November 2024, taken by a classified research program the night he escaped in December, and kept in its facility until 15 JAN 2025. The program gave him experimental drugs. Near the end he was asking for more of them. The Bureau's psychologists call him antisocial, sadistic and delusional, with a body temperature none of them can explain.

THE SECOND READING. What the field reports describe. No mouth: smooth skin covers the lower face. He does not speak. People near him say his thoughts arrive inside their heads and burn, and some cannot move while it happens. Several have not recovered. The program's own records say he was first documented during a failed military experiment whose stated aim was to "breach the dimensional barrier", and give his origin as "Hell".

FEEDING. The field reports say he lives on pain and despair, and that being near suffering makes him stronger. He is drawn to conflict zones and mass casualties. Autopsies of people who died near him found the deep structures of the brain burned from inside, with no wound and no burn on the skin.

MOVEMENT. First on paper in a house in north Dublin, searched 13 OCT 2023: weapons, and a passport in his name from a state that does not exist. Then the hospital, then the facility. Less than a day after he walked out of it he was photographed in Paris, England and southern Iraq within three minutes.

COMBAT. He fights like a trained soldier. The field reports say he has taken what he knows from the people he killed. He prolongs suffering when he can. They credit him with more than 500 deaths. The Americans can confirm none of them. Two partner reports say rounds that hit him had no effect.

NECROSOCIETY ALIGNMENT. Member. Partner services place him at seventeen mass-casualty events since 2023. He treats what we do as the most efficient way to get the one thing he wants. That is all the arrangement has ever needed.

CURRENT THREAT STATUS. At large. Last fix: Rome, 17 JAN 2025. Their standing order is DO NOT ENGAGE. In their words he cannot be killed by conventional means, and an armed response only makes him stronger. Their guidance if he is encountered: think of nothing. Empty your mind. Pain is what it seeks.

WHAT BOTH READINGS AGREE ON. He does not stay where he is put. The people who look after him get sick, and some of them die without a mark on them. The program wanted him for what he does to other people's minds. So did we.

MONEY. None that anyone has found. He has never asked us for any.

HANDLING. Nobody meets him alone, and nobody meets him hurt.

Title:	(U) NECROSOCIETY; KARATEL - INTERCEPTS, 14 - 16 JAN 2025
Date:	01/17/2025
From:	PHILADELPHIA JTTF Contact: SA [redacted]
Approved By:	SSA [redacted]
Drafted By:	[redacted]
Case ID #:	315N-PH-3420917 (U) NECROSOCIETY; INTERNATIONAL TERRORISM
Synopsis:	(S//NF) Facility radio and call recordings, and two messages obtained under FISA authority 24-[redacted].

Details:

(S//NF) **1. Facility radio.** Two transmissions on the facility's handheld radio channel. No transmitting station was identified. Text as written in the log by the operator on duty:

> 01/14/2025 03:12 EST - "The voices... they're getting stronger... something's wrong with my head..."
> 01/15/2025 19:05 EST - "The organization has people everywhere... the plan starts tonight... they don't know what's coming..."

(S//NF) After the first, the operator was found unresponsive at the console for 2 hours 24 minutes. The operator of the second has had severe migraines since.

(S//NF) **2. Messages.** Sent 01/15/2025 14:22 UTC from accounts attributed to NECROSOCIETY, decrypted by OTD: "Surveillance is authorized. Begin at 40.722 N, 73.996 W. Minimal casualties preferred. Priority: psychological operations." and "Subject is responding to treatment at 94% efficiency. Local behavioral changes increasing. Recommend expanding observation radius."

(S//NF) **3. Call.** Facility recording system, outside line, 01/16/2025 04:33:17 UTC (23:33 EST on 01/15), 3 minutes 47 seconds. Speaker A is a program staff member, the subject's handler. Speaker B ("Command") is not identified.

> A: The subject is asking for more medication. Says the current dosage isn't... working anymore.
>
> B: Let them try. KARATEL thrives on chaos. Their confusion will only make the research more valuable.
>
> [bg] [muttering, 47 seconds] ...voices... must... listen... reality... breaking...
>
> A: [no further speech; the line stays open to the end]

(S//NF) Comment: At 23:40 the handler was found against the wall of the control room, unable to answer questions, and was hospitalized. The subject was logged missing at 23:51. Facility records state the subject has no mouth; the background voice is not identified. Message 2 indicates a source inside the facility. The point in message 1 is in Lower Manhattan; New York has been informed.

FEDERAL BUREAU OF INVESTIGATION

Date of entry 01/21/2025

[redacted], a registered nurse employed by the contractor that operates the facility, was interviewed at the Allentown Resident Agency. After being advised of the identity of the interviewing Agents and the nature of the interview, [redacted] provided the following information:

[redacted] worked nights in Sector 7 from 12/20/2024, the morning the subject was brought in. The team that collected him near the state hospital used tracking equipment. They told her the roadside was covered in dead deer and birds for about two kilometers.

The subject's lower face is smooth skin. There is no opening. He was fed by tube. His temperature stayed near 32 C and the rooms near him were always cold. Asked how the subject made requests, [redacted] said she did not know. "You just know what he wants. It's like remembering something you didn't think." In January he asked many times for more medication.

On 01/08/2025 an FBI interviewer went in with him. The interviewer came out after eleven minutes saying "He's in my head... the voices won't stop..." and was taken to hospital. On 01/12/2025 three researchers left his medical examination ill and later needed psychiatric treatment. He seemed to enjoy the examination.

On 01/15/2025 [redacted] was on duty. At about 23:30 the heating failed and the temperature in Sector 7 fell fast. At 23:51 the doors of Sector 7 opened. She hid in the medication room. When she came out, six colleagues were on the floor. None had a mark on them. The subject was gone.

[redacted] has had headaches since that night. She asked whether he can find her.

Re: (U) KARATEL - psychological assessment
Requested by: Philadelphia, JTTF
Date: 01/17/2025

(S//NF) **Sources.** An attempted clinical interview at the facility on 01/08/2025, ended after eleven minutes when the BAU interviewer was taken ill; facility clinical records, 12/20/2024 - 01/15/2025; the polygraph of 01/10/2025; staff accounts.

(S//NF) **Structured measures** (records-based). PCL-R: 32 of 40. HCR-20 V3: summary risk rating HIGH.

(S//NF) **Observations.** Complete absence of empathy, marked sadism, and an apparent dissociation from reality. Claims telepathy, teleportation and the power to move matter, appears to believe these claims, and becomes extremely agitated when they are challenged. His manipulation of staff produced stress reactions, panic attacks and short dissociative episodes in them. Seven research staff needed extended psychiatric treatment. Body temperature 32.1 C at examination on 01/12/2025, with irregular vital signs. The lower face is covered by smooth skin; the records give no surgical history. Staff could not say how he communicates. The interviewer of 01/08/2025 remains in hospital.

(S//NF) **Diagnostic impression.**

F60.2	Antisocial personality disorder, with sadistic features
F22	Delusional disorder, grandiose type
F44.81	Dissociative identity disorder
F19.950	Other psychoactive substance use, unspecified with psychoactive substance-induced psychotic disorder with delusions (experimental compounds given by the program)
R68.0	Hypothermia, not associated with low environmental temperature

(S//NF) **Risk.** Extreme, with mass-casualty potential. Limit direct contact. Prolonged exposure to him causes severe trauma. Any future custody requires maximum security and an evacuation plan.

POLYGRAPH EXAMINATION REPORT

prepared for the program - copy obtained from the facility 01/17/2025

EXAMINEE	DATE	LOCATION
KARATEL (as identified)	10 JAN 2025	PENNSYLVANIA - [redacted]
EXAMINER	**TECHNIQUE**	**CHARTS COMPLETED**
[redacted]	Zone comparison, 3 charts	3 (THREE)

Relevant questions

R1. Do you hear voices in your head? **NO**

R2. Have you killed anyone? **NO**

R3. Are you working with NecroSociety? **NO**

Chart data

Heart rate irregular, with stress patterns at every relevant question. Electrodermal: elevated at R1 and R2, the largest the examiner has recorded at R3. Respiration: suppression at all three.

	R1	R2	R3	Total
Chart 1	-4	-2	-5	
Chart 2	-3	-3	-6	
Chart 3	-4	-2	-5	
Grand total				**-34**

Result

SIGNIFICANT RESPONSES - DECEPTION INDICATED (grand total -34; cut-off -4). R1 deception indicated; R2 significant reaction; R3 extreme reaction.

Examiner's remarks

The examiner recorded each answer as heard. The audio recording of the examination contains the examiner's voice only. The examiner reports a headache that began during the second chart and lasted until 13 JAN 2025.

Laboratory Report

To:	Philadelphia, JTTF
Case ID #:	315N-PH-3420917
Lab No.:	2025-0121-[redacted]
Date:	02/03/2025
Title:	(U) KARATEL; FACILITY, SECTOR 7

Specimens received 01/21/2025:

Q1	Psychiatric evaluation of the subject, four pages, recovered from the facility
Q2, Q3	Blood samples from the subject, drawn 01/12/2025 at the facility
Q4 - Q9	Blood samples from the six deceased staff, submitted by the county coroner

Questioned Documents Unit. Q1 was examined with an electrostatic detection apparatus (ESDA). Page 4 carries indented writing from a sheet that was written on while lying on top of it. The surface writing of Q1 is unrelated. The indented writing reads, in capitals:

> NECROSOCIETY CONTACT ESTABLISHED - SUBJECT READY FOR PHASE 2 - INITIATE MINDBRIDGE PROTOCOL

No known writing has been submitted for comparison. The sheet that made the impressions was not found.

Chemistry Unit. Q2 and Q3 contain three compounds that could not be identified. Their mass spectra match nothing in the NIST or SWGDRUG reference libraries. Q4 - Q9: no drugs, poisons or carbon monoxide were detected. The coroner reports severe trauma within the brain in all six, no external injury, and cardiac arrest as the cause of death.

Remarks. The specimens are retained. "MINDBRIDGE" appears elsewhere in this case only in program records obtained from the facility.

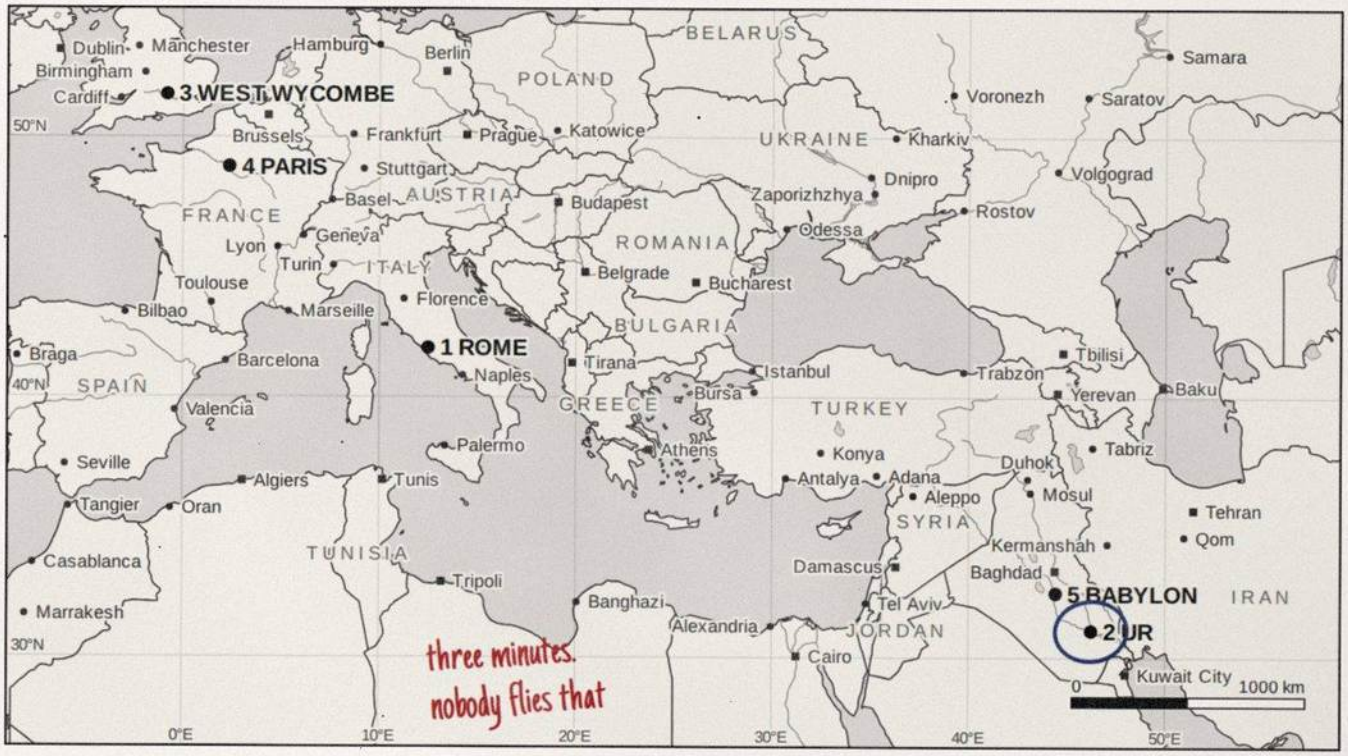
(S//NF) **Comment.** Rows 4 and 5 conflict with custody records. The Paris return of 01/12 was recorded during the subject's medical examination at the facility; the Babylon return was recorded three hours before his escape from the state hospital. Cameras 1-3 recorded him within three minutes at sites up to 4,400 km apart; each camera clock was checked and found correct to within two seconds. All sources are rated reliable. The discrepancy is unresolved. West Wycombe is about 40 km from AWE Aldermaston. The tracking device fitted on 12/20/2024 stopped reporting at 23:51 EST on 01/15/2025.



Map: points 1-5 as listed above.

Patient escapes state hospital; dead deer found near search

A patient described by officials as high-risk escaped from a state psychiatric hospital late Thursday, state police said. Federal authorities took over the search before dawn on Friday. Game Commission officers removed dozens of dead deer and birds from woods near the search area. No cause has been given.

KEYSTONE DISPATCH — JANUARY 13, 2025

Escaped patient linked to terror group, sources say

The man who escaped from a state hospital in December has been linked to the terror group NecroSociety, according to two people familiar with the investigation. One said he offered the group "psychological warfare" in exchange for experimental procedures. Federal officials declined to comment.
