B. ASSESSMENT

NECROSOCIETY - INTERNAL - PAGE 1 OF 2

ORIGIN. Born in Baghdad. As a child he suffered a throat injury his family put down to a curse. Hospital records call it a self-inflicted wound to the neck. The larynx was crushed and the vocal cords damaged. He has spoken only in a whisper since.

SKILLS. Contract killing. Blades of every kind: throwing knives, kukris, karambits, fighting knives, ceremonial blades. He kills with a single cut to an artery and leaves very little for the people who come after. The Western services credit him with 47 killings across the conflict zones of the region. That number is theirs.

BELIEF. He works a mix of Haitian Vodou, hoodoo and old Mesopotamian hexwork. He draws veve, the Vodou symbols, in blood. Witnesses have told the services that people he whispered to died afterwards of bleeding inside the body, with no wound. Their teams have found blood sigils and arrangements of bone at houses he used.

MANNER. Polite. Friendly. Witnesses describe him as unnervingly courteous. Very little sets off extreme violence, and he can keep a conversation going while he works on a body. He calls the people he kills "necessary removals".

MONEY. Contract payments come in bitcoin and through the hawala houses of Najaf, Diyala and Basra. He moves money for the organization through the same houses.

MOVEMENT. Baghdad is home. He keeps safe houses in Baghdad, Mosul and Basra and crosses into Syria by the smuggling routes along the border. He goes to Turkey for blades.

NECROSOCIETY ALIGNMENT. Member. Takes contracts for the organization, and through it: The Americans connected him to us from intercepted calls in 2024. What they have on how far it goes is thin.

CURRENT THREAT STATUS. At large in Iraq. Last confirmed in Baghdad, 18 SEP 2024, the night his house was raided. Their standing orders on him: do not provoke him, keep at least 50 meters away, and wear blade-resistant armor. If his whispering can be heard, assume a hex is being cast. Surveillance teams are told to stay 500 meters back.

HANDLING. Meet him in daylight. Let him finish what he is saying.

Title: (U) NECROSOCIETY; SENTFROMIRAQ - INTERCEPT SUMMARY, 14 - 17 SEP 2024

Date: 09/18/2024

From: DETROIT
JTTF
Contact: SA [REDACTED]

Approved By: SSA [REDACTED]

Drafted By: [REDACTED]

Case ID #: 315N-DE-3391406 (U) NECROSOCIETY; INTERNATIONAL TERRORISM

Synopsis: (S//NF) Summarizes messages and voice traffic attributed to SENTFROMIRAQ, obtained from a partner service and under FISA authority 24-[REDACTED].

Details:

(S//NF) Two messages from an account attributed to SENTFROMIRAQ were decrypted by OTD. Plaintext follows:

09/15/2024 03:33 UTC - "The whispered curse has been placed. Target will bleed from within by dawn. Veve complete."

09/16/2024 20:02 UTC - "Blade consecration ritual tomorrow. Mesopotamian incantations mixed with Petwo rites. Bring the karambit."

(S//NF) On 09/17/2024 at 22:15 UTC a call of 2 minutes 17 seconds was received on an Iraqi handset (+964 77 [REDACTED] 1995). Cell site: Baghdad. Speaker A identified as SENTFROMIRAQ; he whispers throughout and parts of the call are lost. Speaker B is an unidentified adult male.

A: [whispering] The contract is accepted. Three, as discussed.

B: Payment is in the account at [REDACTED]. Clean and quiet.

A: [whispering] Always quiet, friend. The blades speak for me.

B: [laughs] Right. Just no hex stuff this time.

(S//NF) Call detail records for the same handset:

Date / time (UTC)	Other party	Duration	Cell site	Direction
09/14/2024 18:22	+90 53 [REDACTED] 1312	4:13	MOSUL - AL-ZUHOOR	IN
09/16/2024 03:33	+963 9 [REDACTED] 666	0:47	MOSUL - AL-ZUHOOR	OUT
09/17/2024 22:15	withheld	2:17	BAGHDAD - RUSAF A	IN

(S//NF) Comment: "Veve" refers to Haitian Vodou ritual symbols, and "Petwo" to one family of Vodou spirits. At about 05:50 on 09/15/2024, two hours after the first message, a security contractor was found dead in his quarters in Baghdad. The autopsy found internal bleeding and no injury; the cause of death is listed as undetermined. No link has been established.

Detroit - JTTF - medical records summary (translated from Arabic)

Re: (U) SENTFROMIRAQ - medical records obtained through partner service
Case ID #: 315N-DE-3391406
Date: 09/24/2024

(S) Four records were obtained. They are summarized in date order. Translation by FBI Language Services.

1. Baghdad Medical City, emergency admission, 2004 (subject aged 8). Lacerations to the front of the neck and a crush injury to the larynx. The family stated the child had done this to himself in his sleep and asked for a cleric to be called. Surgical repair. Discharged after 19 days unable to speak above a whisper. Code on the record: S11.01 (laceration, larynx), later R49.1 (aphonia).

2. Detention medical examination, Mosul, 03/28/2020 (Iraqi service). Old surgical scars at the neck. Extensive ritual scarring on both forearms and the torso, healed and recent. Many small blade scars, consistent with repeated cutting. Four upper and four lower teeth filed to points. Speech whispered only. Otherwise healthy.

3. Private clinic, Mosul, 09/15/2024. Fragment wounds to the left thigh and side after an explosion on the road south of the city. Operated on the same night. The patient refused anaesthesia, saying that "pain is instructional", and stayed awake and cooperative for the whole procedure. He left the next morning.

4. Laboratory report on samples from record 3. Blood: raised levels of plant alkaloids that could not be identified. Stomach contents: soil and powdered bone. The laboratory notes these are consistent with preparations used in Vodou and hoodoo ritual.

(S) Comment. Record 3 places the subject in Mosul on 09/15/2024, three days before the raid in Baghdad.

Re: (U) SENTFROMIRAQ - psychological assessment

Requested by: Detroit, JTTF

Date: 09/20/2024

(S//NF) **Sources.** Recordings and translations of two interviews held by an Iraqi service in Mosul on 03/28 and 03/29/2020, the medical records summarized separately, and the case file to date. BAU has not interviewed the subject.

(S//NF) **Structured measures** (records-based). PCL-R: 35 of 40. HCR-20 V3: summary risk rating HIGH; risk of serious physical harm HIGH.

(S//NF) **Observations.** In both interviews the subject was courteous throughout and described methods of killing in a calm whisper. He referred to his victims as "necessary removals" and showed no remorse. Detailed knowledge of anatomy. Ritual behavior is fixed and repetitive. The interviewers reported finding his whispering hard to sit through.

(S//NF) **Diagnostic impression.**

F60.2 Antisocial personality disorder, with marked psychopathic features

F43.10 Post-traumatic stress disorder

F42.2 Obsessive-compulsive disorder, mixed obsessional thoughts and acts (ritual)

Z65.8 Religious or spiritual problem

R49.1 Aphonia, following laryngeal injury in childhood

(S//NF) **Risk.** Imminent and extreme. Violence is instrumental and paid. Do not interview him without blade-resistant armor and tactical support.
